

Havish Wali

Aerospace Engineering and Computer Science @UNSW

About Me

Eng/CompSci student who loves amateur rocketry, the process of engineering and app development. I'm naturally curious (a bit too much if you ask others) and LOVE learning. Nothing feels better than feeling stupid after learning something new!

Experience

Cofounder | [udown](#)

Sydney | 2025 - Current

udown is the kryptonite to plans never making it out of the groupchat. It makes it easier than ever for you to see when all your friends are free, and *finally* find the time to go on crazy sidequests.

Math Tutor | Art of Smart

2026 - Present

- Tutored Year 10 Mathematics to students through creating interactive lessons, that focus primarily on building up ideas sequentially and using logic to come to conclusions about mathematical concepts, rather than straight rote memorisation.
- Created homework sheets that test multi-step integrated problems that go deep into multiple concepts, rather than shallow basic questions regarding the content being completed in class.

School Prefect

Sydney | 2024 - 2025

- Ran events such as barbeques, fundraisers, alongside day-to-day duties such as quote of the week for student/teacher engagement and various duties.
 - Learnt leadership skills and often guided and assisted others.
 - Also shaved my head.
-

Education

UNSW | 2026 - 2030

Bachelor of Engineering Hons. (Aerospace) and Computer Science

Skills

TypeScript, JavaScript, React, C, React Native, Onshape, Fusion360, Making jokes that fall flat

Interests

Almost anything - if I find it cool, I'll be interested. STEM.
